**SPELEAN**

Crolles the 5th of June 2014

**Subject:** Stickers for Petzl VERTEX helmets

The Petzl VERTEX stickers (References: 7815 EH; 7810 EH or 7874 EC) are compatible with Petzl VERTEX helmets.

If stickers other than those supplied by Petzl are to be used, we recommend stickers with an acrylic based glue and without any solvent, as is the case with the Petzl stickers.

The 3M Scotchlite Plus 680 Series Reflective Sheeting, with Controltac Adhesive, which is used for the manufacture of the Petzl VERTEX stickers, complies with these specifications.

It is also recommended that stickers should be positioned on the lateral sides of the helmet and in the designated places.

Staying at your disposal

Best regards

**Petzl Customer Service**
